<b>4. First Aid Measures</b>
------------------------------

**4.1. Description of first aid measures**

- Skin contact:** Immediately flush skin with plenty of water.
- Inhalation:** Remove to fresh air. If not breathing, give artificial respiration, preferably mouth-to-mouth. If breathing is difficult, give oxygen. Get medical attention.
- Ingestion:** If swallowed, do NOT induced vomiting. Have victim drink 8-10 ounces of water to dilute material in stomach. Get medical attention immediately. Never give anything by mouth to an unconscious person.
- Eye Contact:** In case of contact, Immediately wash the eyes with plenty of water for at least 15 min. holding the eye open. Obtain medical attention urgently.

**4.2 Most important symptoms and effects, both acute and delayed**

**Skin contact:** An itchy rash may occur at the site of contact.

**Eye contact:** There may be irritation and pain. The vision may become blurred.  
**Ingestion:** The casualty may appear intoxicated.  
**Inhalation:** There may be irritation of the throat with a feeling of tightness in the chest.

## 5. Fire Fighting Measures

### 5.1. Extinguishing media

**Extinguishing media:** Alcohol resistant foam. Dry chemical powder.

### 5.2. Special hazards arising from the substance or mixture

**Exposure hazards:** Highly flammable. Forms explosive air-vapour mixture. In combustion emits toxic fumes of carbon dioxide/carbon monoxide.

### 5.3. Advice for fire-fighters

**Advice for fire-fighters:** As in any fire, wear self-contained positive-pressure breathing apparatus and full protective gear. Containers can build up pressure if exposed to heat (fire). Cool with water spray.

## 6. Accidental Release Measures

### 6.1. Step to be taken in case material is released or spilled

Remove all sources of ignition and ventilate area. Wear appropriate safety equipment as listed in Section 8. Absorb on inert material, then place in a chemical waste container. After removal, flush contaminated area with water and collect for disposal. Clean up spills immediately. Obey relevant local, state, and federal law regulations. Do not contaminate any lakes, streams, ponds, groundwater or soil. Dispose and report per regulatory requirements if necessary. Please prevent washings from entering waterways.

## 7. Handling and Storage

### 7.1. Precautions for safe handling

**Handling requirements:** Keep away from heat. Keep away from sparks, flames and other sources of ignition. Avoid contact with eyes, skin and clothing. Avoid breathing vapor or mist. Store in well-ventilated area. Use explosion-proof equipment. Wash thoroughly after handling. Follow all MSDS/label precautions even after the container is emptied because it may retain product residues. Wash thoroughly after handling.

**Other Precautions:** Avoid ignition sources or excessive temperatures. Heat can induce polymerization with rapid release of energy. Closed containers may rupture explosively. Spontaneous polymerization may occur with prolonged aging.

### 7.2 Conditions for safe storage, including any incompatibilities

**Storage conditions:** Store in cool, well ventilated, dry area. Keep container tightly closed. Maintain air space inside storage containers.

## 8. Exposure Controls / Personal Protection

**8.1. Control parameters**

**Workplace exposure limits:**            Not applicable.

**8.2. Exposure controls**

**Engineering measures:**            Use process enclosures, local exhaust ventilation or other engineering controls to control airborne exposure. Use explosion-proof ventilation equipment.

**Respiratory protection:**            Wear an appropriate, properly fitted respirator (NIOSH/MSHA approved) during application and handling unless air monitoring demonstrates vapour/mist levels below applicable limits. Follow respirator manufacturer's recommendations for selection and use.

**Ventilation:**                            Sufficient ventilation must be provided to maintain airborne concentrations below TLV, PEL and LEL limits as listed in Section 8.

**Hand protection:**                    Chemical resistant protective gloves should be worn when handling this product. Check with glove manufacturer to determine proper glove type.

**Eye protection:**                      Splash-proof chemical goggles should be worn

**Skin protection:**                      Impervious clothing and boots should be worn. Eye bath and safety shower should be provided.

**Hygienic practices:**                Good personal hygiene practices are required at all times when handling chemicals. These practices include, but are not limited to, washing when safety equipment is removed, at the end of each shift or when going on breaks and especially if contamination occurs.
